
SoUL IT Networks
"We make technology accessible "

ABOUT US.....
WHO WE ARE

SoUL IT Networks a leading system integrator focusing on IT Infrastructure, Video Conferencing, Surveillance, Network Security and Customized Software Solutions. We offer wide array of solution and products customized for various segments like Government, Education, Hospitality, Railways, PSU's, Telecom, Corporate etc. We provide end to end solution and services in IT infrastructure, Surveillance System and CCTV, Audio-Video Solutions, Network Security, Network Voice, Server/Storage, Interactive Panels, Video Wall and to integrate these systems to provide our client a single point solution.

QUALITY POLICY

Our organization and its subsystems are designed, equipped and forced to for continual improvement of our services and processes. We have our quality policy towards customer satisfaction at every stage of a project. In support of this, we ensure that our solutions and services are designed and delivered in a way to positively contribute to our clients need and exceed quality, timeliness and other agreed performance requirements.

- Adopt the quality policy as part of normal business practice.
- Take appropriate action to control risk and prevent errors.
- Participate in improvement programs, training activities and promote awareness of the importance of compliance and improvement

SUPPORT SYSTEM

Strategic network implementation is essential for responding to changes in the environment like those taking place today, as well as speeding up support process. An efficient and on time support to our valuable customer is our prime concern. To provide best after sales service and support we have resident engineers covering North-India and for other regions we have tie-ups with our partners. Also we have our in house support call center system so that client can easily have first level support within hours.

What we do

EXPLORE OUR SERVICES

ENTERPRISE NETWORKING

- For any organization transportation of Data,Video and Voice is very crucial and business processes are highly dependent on this infrastructure. We offer reliable, scalable and robust network solutions to our customers. We deliver a network that is more dynamic, scalable and secure which in turn deliver the unmatchable performance.

- Recent Advancement in technology leads to converged data, voice and video network solutions. We have expertise to deliver these solutions to simplify network, reduce capital and operating expenditure. We have expertise in helping our clients to integrate with multi vendor solutions to specific client requirement.

ENTERPRISE NETWORKING

- **Wired Network -** Soul IT Networks has a strong capability to design and deliver a reliable network. We have following given expertise to create a state of art Wired network.
- **Wireless Network -** Now a Days organizations are moving towards wireless solutions due to phenomenal transformation in mobility segment. We have a capability to design and deliver indoor and outdoor wireless enabled network.
- **Data Center -** As organizations are adopting IT measures so their requirement for data management is increased drastically. We have certified professionals who simplify your data center operations and enable your applications to perform better. We have complete range of solution for computing, Data center switching and security in converged and hyper-converged data center establishments.
- **Software Defined Network (SDN) -** A network that is agile, secure and can accommodate rapid network configuration changes can be a major enabler for cloud and mobility. This agility, integrated and secure network is easily achieved with the deployment of a Software Defined Network (SDN)

NETWORK SECURITY

- Today's organization biggest concerned is of network security. Taking care of security of valuable data is not just deploying a hardware or software in a network, it's a multi-level architecture that should be well incorporated in your IT infrastructure. We have high-performance network security solution for internal segmentation, and next generation firewall. We always encourage our customers to opt a comprehensive security measures which is scalable, sustainable and can create a security infrastructure.

- Network Security involves access control, virus and antivirus software, application security, network analytics, types of network-related security (endpoint, web, wireless), firewalls, VPN encryption and more.

COLLABORATION SOLUTION

- Unified communications and collaboration is versatile term that takes the various methods used in conference calls such as text, audio, video and virtual white boards and makes them available through a single interface.

- In its broadest sense, UC can encompass all forms of communications that are exchanged via a network to include other forms of communications such as Internet Protocol Television (IPTV) and digital signage Communications as they become an integrated part of the network communications deployment and may be directed as one-to-one communications or broadcast communications from one to many.

AUDIO VISUAL, INTERACTIVE PANELS, VIDEO WALL SOLUTION

- The most important challenge of any AV integration is creating a vehicle for information flow. Without a dependable delivery system for communication, mistakes happen. Critical information needs to be provided in real-time so every member of a team is instantly informed.

- The team is often diverse and includes: sales, design engineers, order management, programming, testing and installation technicians, project management, construction trades, and the help desk. If there is no mechanism made for keeping everyone tuned-in on all issues, breakdowns can easily happen, especially across departments.

WE HAVE WIDE RANGE OF PRODUCTS AND SOLUTION WITH RESPECT TO AUDIO VISUAL, INTERACTIVE PANELS AND VIDEO WALL REQUIREMENTS.

SECURITY & SURVEILLANCE SOLUTION

- Now a days security and surveillance system has became so much of concern from individual to government agencies and for the same we have separate division who is concentrating on this. As Analog based Surveillance technology changed to IP based and become part of Data, voice and video integration. Accordingly we too have solutions and services in this segment.

- The pace of innovation around security is exciting. The Internet of Things (IoT) has had an incredible impact on security applications in terms of complexity and creating opportunity. We understand this and takes each of the technologies that fit into security and surveillance and seamlessly puts them together for you.

STRUCTURED CABLING

- A properly designed and installed structured cabling system provides a cabling infrastructure that delivers predictable performance as well as has the flexibility to accommodate moves, adds and changes; maximizes system availability, provides redundancy; and future proofs the usability of the cabling system.

- With an unorganized messy cabling infrastructure, mistakes are commonly made. Incorrect ports are unplugged. Even worse is the messy cabling that gets in the way. Trying to remove a single cable from a large tangled mess can cause stress on the other cables. This stress can lead to network and channel errors in the hardware that are very difficult to trace.

OUR ESTEEMED CUSTOMERS

CUSTOMER NAME	PRODUCT
Uttar Pradesh State Data Centre	Network Switch
India Institute of Technology Mandi Himanchal Pradesh	Network Firewall NGFW
Treasury Directorate Uttar Pradesh	Network Firewall NGFW
Kanpur Development Authority Uttar Pradesh	Video Conferencing System
Police Technical Services (Home Department)	Network Firewall NGFW, SandBox, Analyzer
High Court Lucknow	AMC of Data Centre for Server and Storage
Bhatkhande University Lucknow	Audio Video Conferencing System
IIT Kanpur	Rack Servers
UP Lucknow Metro Corporation	Rack Servers
Veer Bahadur Singh Purvanchal University Jaunpur	Rack Server
Updesco	Tablet PC
Updesco	Interactive Panel
UPPCL	Video Conferencing System
